

Kit 4 Rhexis Trainer with Cataract

# Your Pathway to Rhexis Perfection Starts Here!

Discover more

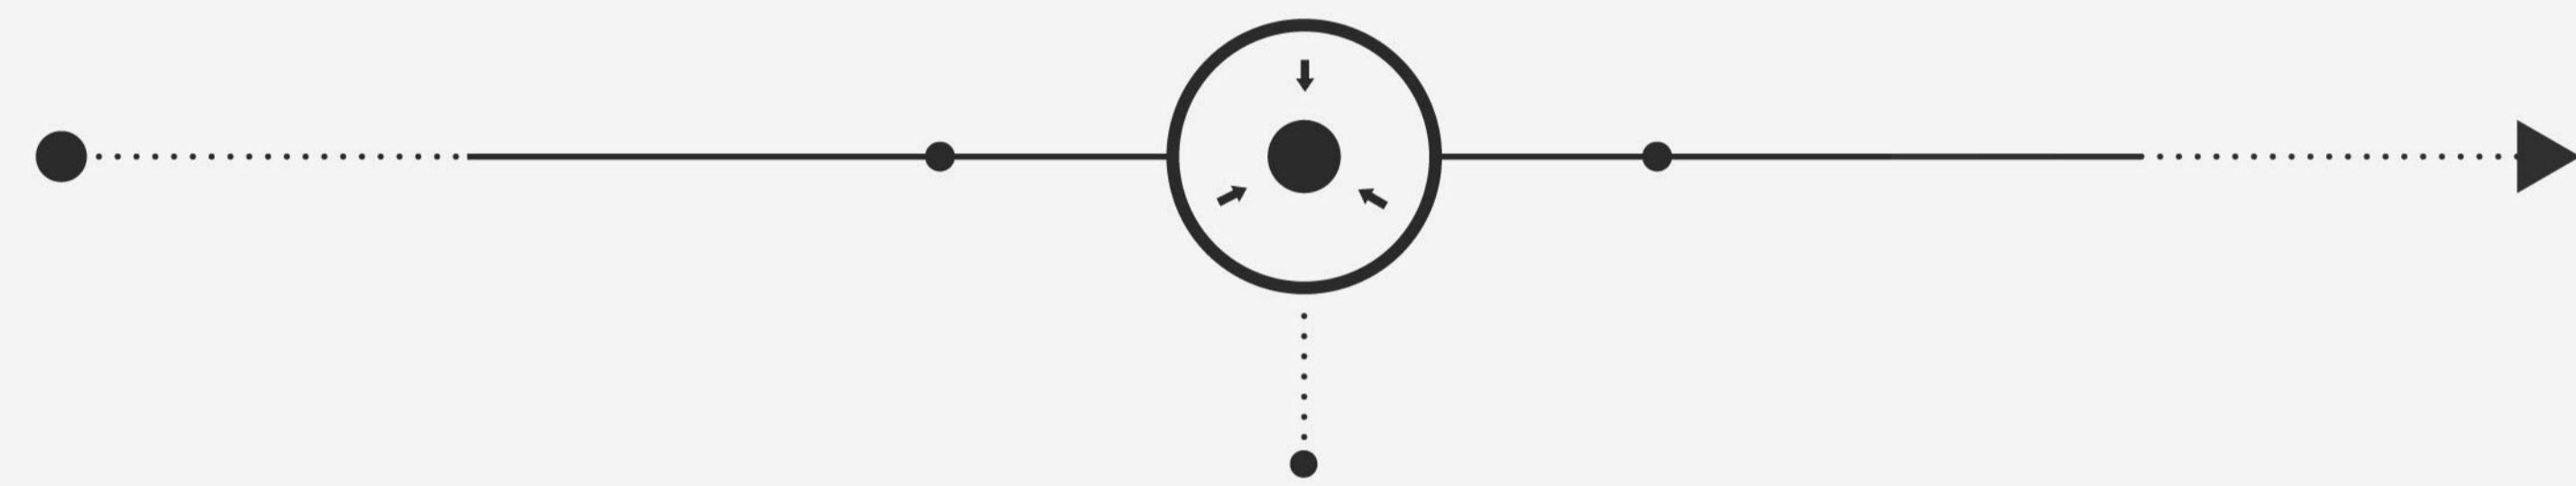

## Beginner Rhexis Trainer

The Beginner Rhexis Trainer is perfect for those just starting out in rhexis surgery. By adjusting the Rhexis Foil between the Rhexis Base and the Ring 4 Fixation, trainees can start the training! We recommend practicing with the Beginner Rhexis Trainer at least 50 times before moving on to the next level.

## Open Sky Rhexis Trainer

The Open Sky Rhexis Trainer is the ideal next step for those looking to improve their rhexis skills. With the addition of the Open Sky Top, featuring three different incision options and an artificial sclera for a more realistic training experience, users can take their skills to new heights.

## The Advanced Rhexis Trainer

The Advanced Rhexis Trainer is the ultimate tool for experienced surgeons looking to fine-tune their rhexis technique. With an artificial cornea, this trainer offers a more realistic training experience. After the capsulorhexis, the trainee can move on to the phaco operation with three different types of cataracts to choose from.
